- The unit will not work without water.
- Use 2-3 drops essential oil per 100ML water *only*. Too much oil will clog the system and cause malfunction. Please clean the unit as per the maintenance instructions, before changing to a new type of essential oil.
- Add water first, followed by the essential oil, as the essential oil may block the Ultrasonic vibration plate and cause malfunction.

### Accidental leakage

In the event the unit is knocked over or spillage occurs during use, please follow the steps below to avoid malfunction.

- Unplug the unit and remove cover.
- Empty water tank.
- Shake the unit gently to drain any water inside the mechanism, and then allow to dry for at least 24 hours.
